

Comet Studios is a dynamic consortium of creative professionals who share passion for the natural environment, sustainability & architectural excellence.

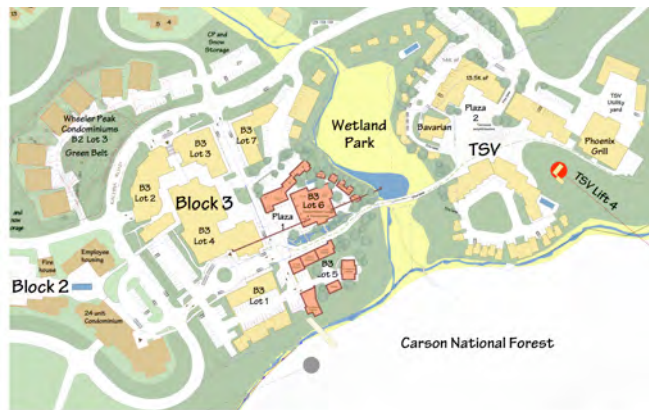

With over twenty-five years of architectural planning & design experience, Comet Studios consortium combines the principles of New Urbanism with environmentally conscious planning and design, creating solutions that promote sustainable communities.

### Our Creative Process

Successful planning & design integrates artistic vision, environmental sensitivity, community values and viable economics to create memorable communities that stand the test of time.

At the start of every project we help define the scope, budget, timeline, site specifications & constraints. In our design process we simplify the complex, clarify & refine ideas, identify needs & desires.

Taos Ski Valley, Kachina Planning, Design & Development

### Our Philosophy

The Studios philosophy incorporates environmentally conscious green building design with innovative, cost effective, & energy efficient passive solar solutions, in context with the surrounding community & the natural environment.

**Our Services:**

Comet Studios offers full comprehensive planning, design & real estate development services for residential & commercial clients. Our projects vary from:

- Single family homes
- Cabins & Log homes
- Custom estates
- Condominiums & Live / Work Lofts
- New Urbanism planning
- Land analysis & acquisition
- Real estate development

Serving Angel Fire, Eagle Nest, Santa Fe, Taos Ski Valley & beyond.

As professionals dedicated to providing viable solutions, we consider ourselves dream makers & visionaries, creating architecture & communities as an art form & backdrop for our lives.

*“Considering ourselves dream makers, we strive to help our clients manifest their dreams & lifestyle goals. We believe that the dreams which accompany all human actions, should be nurtured by the places in which people live and work...”*

- John Edmund Halley,  
 Catalyst
